Dear Sir or Madam,

I have taken great interest in the advertised position and would like to apply for it.

Over the past three years, I have dedicated myself to advancing my skills in web development. During this time, I completed a six-month internship and worked in a project-based job, accumulating a total of one year of experience.

Throughout my professional journey, I have utilized JavaScript, React, and Material-UI in the frontend, as well as PostgreSQL, Node.js, and Express.js in the backend. Using these technologies, I designed and successfully implemented a project for a company.

Furthermore, I consistently stay abreast of technological developments. During this period, I have expanded my skills by incorporating various technologies such as TypeScript, Redux, C#, ASP.NET WebAPI, GraphQL, PrismaORM, Docker, MSSql, and Entity Framework into my projects, gaining diverse experiences.

With my engineering background, professional experiences, and acquired knowledge in various technologies, I believe I am a strong candidate for this position. I would be delighted to introduce myself in person to discuss the possibility of further collaboration.

Yours sincerely,

ALI ERDEL
